**Course description**
Irreversibly, current and future businesses will have to be sustainable. In this sense sustainable is attracting the attention of companies, consumers, policy-makers, stakeholders and business agents from around the world. Thus, the number of companies developing and implementing sustainable business strategies is growing. To carry out this challenge successfully companies are recruiting managers prepared in this cross-disciplinary topic. This course is an introduction to all of the Sustainable Business Management: Global sustainable models, trade, industry, consumption, trends, strategies, key sectors, policy and more.

In the class, students will learn the vision and the tools required in order to effectively manage all of the challenges that new sustainable business models are currently demanding. The course explains the “whats” and the “whys” of sustainable business in order to learn a big perspective and deep capabilities around the sustainability competitive advantages.

**Methodology**
The class will be based in lectures as well as practices with examples of Sustainable Business Management. We will be paying attention to both technical and human variables to understand how critical the relationship between business and sustainability is. The professor will provide lecture notes and other supplementary material that he will be uploading on the course website at least one day before the scheduled lecture.

**Assessment**
Exam: 40%
Essay: 40%
Assistance and class participation: 20%
